

AIR COOLED COMPRESSED/UPA, AA, AHP SERIES

FULL LINE OF SIZES
AND FEATURES

ENERGY EFFICIENT

HIGH PERFORMANCE

UPA SERIES

- Horizontal or Vertical Air Flow
- Lightweight, may be Shipped UPS
- Ratings Based on Comprehensive Testing
- Attractive, Durable Baked Enamel Finish
- Floor or Suspended Mounting
- Competitively Priced

AHP SERIES

- Vertical Air Flow
- High Technology Compact Design
- Optional Air Motor
- Rugged Heavy Duty Construction
- Excellent for Heat Recovery

AA SERIES

- Horizontal Air Flow
- Optional Weatherproof Junction Box
- Floor or Suspended Mounting
- Optional TEFC motor(s)
- Ratings Based on Comprehensive Testing
- Wired for Single Point External Connection

air cooled
UPA/AA/AHP

MATERIALS

UPA SERIES

Cabinet - Steel with baked enamel finish
Core - Aluminum fins on copper tubes
Fan - Heavy gauge aluminum with steel hub
Motor - Open vented
Fan Guard - Zinc chromate plated steel

AA SERIES

Cabinet - Galvanized steel
Core - Aluminum fins on copper tubes
Fan - Heavy gauge aluminum with steel hub
Motor - Open vented
Fan Guard - Steel with baked enamel finish

AHP SERIES

Cabinet - Steel with baked enamel finish
Core - Aluminum
Fan - Aluminum hub, polypropylene blades
Shroud - Painted steel
Motor - TEFC
Fan Guard - Steel with baked enamel finish

RATINGS

Maximum operating pressure - 250 psig
Maximum operating temperature - 350°F

HOW TO ORDER

Above specifications are based on 80 to 125 PSIG operating pressures.
 Maximum pressure drop, less than 3 psi.
 *Maximum ratings restricted by pressure drop, actual thermal capacities are higher.
 A flexible metal hose must be properly installed between the compressor and aftercooler to validate warranty.

1. Air inlet to the air motor must be regulated to this pressure.
2. CFM (Free Air) consumption of the air motor. Lubrication = One drop of oil for every 50-75 CFM of air going through the motor. Use detergent SAE #10 oil. Filter, regulator and lubricators for the air motors are required, but not included.
